Integrated electret microphone with  
adjustable sensitivity

**Dimensions:**

Transmitter: 168 x 42 x 25 mm, 138 g  
Receiver: 138 x 42 x 25 mm, 72 g

Guided tours with several people  
and in noisy surroundings should not  
present you with insurmountable  
challenges.

With the **TravelGuide** you make sure  
that every guest, even with enough  
distance, gets everything.

TravelGuide

With our experience of over 40 years,  
we understand how to address the  
special needs of guided tours and serve  
them with a broad product portfolio. In  
our wireless guiding systems we place  
particular emphasis on brilliant sound  
and speech transmission. This means  
that listeners can clearly understand  
what is being said, regardless of the  
surrounding noise level. This guarantees  
a seamless flow of information even

in highly frequented locations or noisy  
environments. The selection of different  
channels makes it possible for several  
groups to follow different guided tours at  
the same time in the same place without  
disturbing each other (also in different  
languages with several speakers). This  
enables your guests and visitors to expe-  
rience the guided tour in a relaxed and  
concentrated manner.
